## **Experience the Polestar effect**

With more than 20 years racing experience, Polestar is at the forefront when it comes to performance optimisation. What we learn from motorsport, we take into the development of new products. The goal is always the same - to offer all Volvo owners an even greater driving experience.

Our optimisation is the result of careful development work within five key areas. Together they form a balanced, well-proven and thoroughly tested package of driving pleasure.

### **Faster throttle response**

Throttle response has been calibrated to respond more quickly to driver commands - something that gives higher precision and better feel.

### **Faster gear changes**

The automatic gearbox changes gears more quickly to both improve acceleration and to better respond to the driver's commands, e.g. downshifts before overtaking.

### **Better gear precision and gear hold**

The gears have also been calibrated to exploit the engine's improved midrange performance. The gearbox also avoids changes when cornering at high g-forces (where possible) for better stability.

### **Faster gear and engine response**

The engine and gearbox have been calibrated to respond more quickly when the driver releases the accelerator. This makes the car more balanced and predictable when cornering for example.

### **Increased engine performance**

We have concentrated the power where it is needed most - in the midrange; perfect for overtaking or when on a busy motorway. Combined with faster throttle response and gear changes this makes the car significantly more dynamic to drive.

NOTE: Could be illegal in some countries. Not for MC10 & MC15 MY19

# Protective plate

Protects the engine, oil pan and transmission from impacts when driving in poor conditions, for example on bumpy or potholed roads. Fully covering aluminium plate that also prevents impacts from loose stones. The protective plate has undergone a number of tests to ensure sustainability in the event of more powerful impacts. The plate does not create any noise and this is verified by the engine being cooled correctly.

Note: Not for MC10 & MC15 MY19

# Floor mats

Floor mats, including a tunnel mat, for the passenger compartment floor. The mats are made of soft and flexible plastic, which have a rubber feel. They have raised edges all around, which give protection against wet and dirt on the car's interior.

The material is rugged and designed in a pattern with soft edges and radii. The driver's mat has a comfortable textile footplate that protects the shoes from wear.

Both the mats' colour and shape are matched to harmonies with the car's interior.

The mats are easy to install and seal tight against the floor. They are fixed with integrated clips through leak-protected installation holes. The mats are easily removed and can be rinsed off with water.

## Kit of five mats - four floor mats and a tunnel mat

# Side Scuff Plates

## V90 Cross Country

Side scuff plate is a design-enhancing sill trim in brushed stainless steel that conveys a robust and rugged appearance.

The sill decor is installed along the sides of the car, under the doors, with its main purpose of enhancing the design and further enhancing the Cross Country character. The sill decor is etched with Cross Country, which enhances the exclusive appearance.

Volvo recommends mud flaps in combination with Side scuff plate to reduce the risk of paint damage caused by wheel and stone spray.

Note: Not for MC10 & MC15 MY19

# Sunshade

## Front windscreen

With a sunshade in the windscreen, your car will maintain a cooler temperature on hot days. The sunshade helps to prevent the sun from heating up the interior, maintains both the air and the interior at a more comfortable temperature on hot days. By protecting your car from direct sunlight, the sunshade also helps to preserve the car's interior colours.

The sunshade has a stylish design and is a very good fit for your car. You can easily install it on the inside of the windscreen and it is secured by the car's sun visors.

When the sunshade is not in use, it is easy to take off, fold up and store in the supplied bag. The sunshade meets Volvo's quality requirements and retains its shape and rigidity after use.

### Sunshade for windscreen

USD	EUR	CAD	GBP
85	75	105	65

# Sunshades

## S90

Fully covering sunshades that provide maximum protection for your passengers when the sun is bright and irritating. Not only do they effectively protect against heat and irritation from sunlight, they also give the car a stylish look similar to tinted windows.

The shades are uniquely tailored to the rear windows of your car, providing a more comfortable trip in strong sunlight.

If the rear side windows need to be lowered during a journey the sunshades minimize the wind noise or "booming noise" that can arise. When the sunshades are not used, they can be stored in the supplied bag.

# Load Liner

V90 & V90 Cross Country

Transport pets or dirty and wet items in the load liner and avoid staining the load compartment of your car.

The practical and durable load liner is easy to clean and its high edges provide maximum protection of the load compartment's ordinary upholstery.

The load liner is robust and has a friction-enhancing surface that reduces the risk of loads or pets from sliding around.

## Load liner

USD	EUR	CAD	GBP
180	160	240	125

**Order Code: T6**

# Dirt Cover

Load compartment, fully covering

A practical protector for the load compartment that covers the floor and sidewalls of the load compartment plus the rear of the rear seats. Made from durable, dirt-resistant vinyl. Gives very effective and fully covering protection of the load compartment when carrying dirty loads. The protection has an integrated dirt cover that can be folded down over the bumper. It prevents clothing from becoming dirty and protects the bumper when loading and unloading.

The back section of the cover can be separated by a Zip, so that the rear seat backs can be folded independently of each other. The cover is also equipped with various pockets on the sidewalls, including a net pocket with Zip for storing various items.

The load compartment cover is easy to use and is simple to secure and remove. It is secured using elastic straps around the head restraints and with press-studs, which are secured to the floor and side panels.

## V90 & V90 Cross Country

USD	EUR	CAD	GBP

# Comfort pillow

## Charcoal

Volvo's neck cushion provides comfortable support for the head thanks to its soft materials and high mouldability.

The neck cushion consists of a textile covered visco-elastic foam that moulds to the contours of your neck. For passengers who are resting or sleeping the neck cushion contributes to comfort as it helps keep the head steady.

The neck cushion is offered in two different versions, in a wool fabric (Beige) and in a nubuck (Charcoal) fabric. The wool fabric which consists of 80% wool is a natural material that is soft and strong. Its excellent breathability contributes to the neck cushion feeling both warm and cool depending on the climate. The nubuck fabric is a durable, high quality material. It provides comfortable support thanks to its soft surface.

The neck cushion is easily attached to the seat using an elastic band and fits all the seats in the car. The back of the neck cushion has a zip that makes it easy to remove the cover for cleaning and airing.

### Comfort Pillow Charcoal (Nubuck)

# Child seat

## Padded upholstery

Padded upholstery for cars equipped with integrated booster cushion. The upholstery has side support that gives the child a comfortable and safe car journey, while at the same time the car's original upholstery is kept clean. It is made of strong high quality fabric and consists of three parts that combine into one complete unit.

### **Cushion upholstery**

The upholstery is easily pulled over the raised booster cushion and is removed when you need to fold it down. The bottom edge of the upholstery has a dirt cover in vinyl plastic that protects the rear seat's original upholstery.

### **Backrest upholstery**

Integrated side support improves comfort and keeps the child securely in place. The upholstery is installed around the standard head restraints and attached at the lower rear section of the backrest.

### **Head restraint upholstery**

A head support that is easily fitted over the standard head restraints in the rear seat and which is attached with Velcro fasteners. Integrated foam pads at the sides give comfortable support and keep the child's head in place while resting

### **Child seat padded upholstery**

USD	EUR	CAD	GBP

# Child seat

## Child booster cushion and backrest

This accessory ensures that your child has a safe and secure car trip. Used together with the standard seat belt, it gives the belt the correct contact with the child's body to provide the best capture in the event of a collision. In addition, the child is higher up and has a better view. For children between 15 kg and 36 kg (33-80 lbs.), approx. 3-10 years old. Volvo recommends that your child sits facing backwards in the car to at least 3-4 years of age. The angle of the backrest can be adjusted to two different angles to give your child a more comfortable sleeping position and has five heights positions. For the safest placement of a child in the car, see the car's owner's manual.

Note: Regulations regarding the placement of children in the car and the type of child seat to be used may vary from country to country. Find out what applies in your country.

# Towbar

## Semi electrical

With the electrically folding towbar you do not have to stretch beneath the car to detach or remove the towbar. Pressing a button in the luggage compartment fold the towbar out. A simple hand movement positions the towbar in a locked position.

For increased safety there is a light indicator on the button that indicates that the towbar is locked. If the towbar is unlocked a warning message is shown in the car's combined instrument panel. The trailer module manages the electronic communication between the vehicle and trailer. With the help of the light control function in the car's display, the lamps on the trailer illuminate in a sequence which makes it easier to check the lighting.

If, when driving, there is a fault or problem with the trailer's direction indicators or brake lights, the trailer module immediately sends the driver information.

The towbar is equipped with Volvo's Trailer Stability Assist-technology (TSA) and interacts with your Volvo's DSTC-system<sup>1</sup>. If the trailer starts to sway back and forth at speeds in excess of 30 mph (50 km/h), TSA can brake one or more wheels to regain stability and maintain control. Each Volvo towbar has been designed for your Volvo. They are an integral part of the car's body and have been tested to ensure that they meet the most stringent safety and function demands.

Note: Not for US and Canada

Note: Not for MC10 & MC15 MY19

175	160	225	130

Order Code: TV

# Bicycle holder

## Frame mounted

A frame-mounted bicycle holder with a modern dynamic design. For safe transportation and flexible attachment, your bike is secured automatically.

The torque limiting knob controls the torque that the bicycle frame is subjected to and clearly shows if attachment is correct. Its frame and wheel holders position the bike automatically when you attach it. The sturdy grapple enables the bike to stand securely upright and the soft padding reduces the risk of damage to the frame. The bicycle holder is equipped with adjustable diagonal quick-release straps that are adjusted according to the bike's tire width.

The bicycle holder is installed using T-track adapters directly on the load carriers, which means that no tools are required. Locking and adjustment can be performed comfortably at the roof height of the vehicle.

The double lock function secures the bikes and the bicycle holder to the car.

NOTE: Only in combination with load carrier

# AutoSock

The perfect aid when driving on snowy and icy roads. The sock is easily mounted on the wheel and provides increased friction on snow and ice. It takes up little space and can be reused. The snow sock will not damage the rims.

The snow sock is made of a high-tech fibre material, the fibres of which are roughened during use in order to provide optimal grip. The material is both strong and resilient to further increase the wheel's contact area with hard snow and ice.

Note: AutoSock is not a replacement for snow chains in countries where it is required by law for snow chains to be kept in the car.

USD	EUR	CAD	GBP
85	75	105	60

**Order Code : SNOWS**

# Snow chains

## K-Summit

This snow chain is very useful, in particularly difficult road conditions with ice and snow where winter tyres are not sufficient.

This type of chain has the advantage of being fitted on the outside and not the inside of the tyre. It does not take up the space required by larger tyres.

Another advantage is that the chain is easier to install than a chain that is installed on the inside of the tyre.

Note 1: Only for 17" & 18" wheels

Note 2: Snow chains must only be used on the front wheels. Also applies to AWD

**Only for 17" and 18" wheels**

# Key fob shell

Wood

Choose between two high-quality, luxuriously designed wooden key fob shells that tastefully match the interior of the car. Key fob shells make your key more decorative and harmonize with the car's Scandinavian heritage.

Wood veneers are handpicked and carefully selected to find the material best suited to you. The natural texture, colour and grain of the wood gives each key fob shell a unique look. Each key fob shell is therefore exclusive.

The key fob shell is made by hand with great care and precision. You can change shell yourself or your dealer can assist you.

Choose between two attractive wood versions, with different nuances and structure:

Dark Flame Birch made of birch and has a classic dark appearance with a luxurious high gloss finish.

Linear Walnut made of walnut wood with a more modern look where the wood's texture and authenticity can be felt.

# Red key

A key for car owners who want the car to be driven responsibly even when someone else is driving it. Red Key helps, for example, parents to encourage young adults to drive responsibly. It also means that you can feel assured when you use valet parking or leave your car at a workshop.

The following settings can be made:

- Restricted top speed. 120 km/h (75 mph) is preset.1
- Cruise control, adaptive. The longest interval to the vehicle in front is preset.2
- Speed warning. 50, 70 and 90 km/h (30, 45, and 55 mph) is preset.3
- Restricted sound level. The volume has a restricted level, which is either on or off. Restricted sound level is preset.

The car's safety functions are always on, which can include the following functions depending on which safety functions the car is equipped with:

- BLIS (Blind Spot Information System).
- Lane Keeping Aid and Lane Departure Warning.
- Forward Collision Warning.
- Driver Alert Control.
- Distance Alert.
- Traffic Sign Recognition.

# Extra Key with remote control

## Remote control

The wide upper and lower surfaces are clean, without any buttons – just a large Volvo-symbol on the upper side. Buttons in aluminium finish are discreetly integrated on the sides – for locking and unlocking the doors and one for the tailgate on one side and a button for the panic alarm on the other side.

At the upper end is a specially designed key fob holder.

Emergency metal key blade is included (hidden inside the remote control)

The remote control for the Inscription variant is clad in leather in the same colour as the upholstery and the R-Design remote control is clad in black perforated nappa leather.

# Lockable bolt

## Lockable wheel bolt kit

Lockable wheel bolts specially developed for Volvo Cars, which gives improved safety.

The lock pattern is located against the middle on the lockable bolts and is therefore difficult to reach with a screwdriver, for example. The top of the lockable bolt rotates and is therefore very difficult to loosen without the right wrench. A solid connection between wrench and bolt facilitates installation and removal, and in principle eliminates the risk of crooked tighten, which results in a damaged wrench.

The bolts have very good rust protection. The design is like a standard bolt but different enough to deter any thieves.

Volvo chromed lug bolts are developed to match Volvo's aluminium wheel rims. With their discreet and exclusive design they constitute a well-integrated part of the wheel area.

Note: Standard on MC10
