# Polestar

T5, T5 AWD & T6 AWD

## Experience the Polestar effect

With more than 20 years racing experience, Polestar is at the forefront when it comes to performance optimisation. What we learn from motorsport, we take into the development of new products. The goal is always the same - to offer all Volvo owners an even greater driving experience.

Our optimisation is the result of careful development work within five key areas. Together they form a balanced, well proven and thoroughly tested package of driving pleasure.

### Faster throttle response

Throttle response has been calibrated to respond more quickly to driver commands - something that gives higher precision and better feel.

### Faster gear changes

The automatic gearbox changes gears more quickly to both improve acceleration and to better respond to the driver's commands, e.g. downshifts before overtaking.

### Better gear precision and gear hold

The gears have also been calibrated to exploit the engine's improved midrange performance. The gearbox also avoids changes when cornering at high g-forces (where possible) for better stability.

### Faster gear and engine response

The engine and gearbox have been calibrated to respond more quickly when the driver releases the accelerator. This makes the car more balanced and predictable when cornering for example.

### Increased engine performance

We have concentrated the power where it is needed most - in the midrange; perfect for overtaking or when on a busy motorway. Combined with faster throttle response and gear changes this makes the car significantly more dynamic to drive.

NOTE: Could be illegal in some countries. Not for MC10 & MC15 MY19

# Sensus Navigation

Sensus Navigation provides intuitive guidance and connects seamlessly with our cloud-based services and navigation apps. It's conveniently operated using voice control or touch-screen controls. Road directions are shown in the driver display and centre display.

You operate the system without taking your attention from traffic – talk naturally to your Volvo, and our voice control carries out your commands. The system can also be operated by a passenger using the centre display touch screen.

You have access to in-car apps that can help you find and pay for parking, share your location with friends or simply find the best coffee in town. To help you avoid congestions, RTTI Real Time Traffic Information gives you a clear view of alternative routes.

Free map updates ensure an up-dated navigation experience.

Note: Driving instructions can be shown on the instrument for all screen sizes. If your vehicle is equipped with a 12.3" screen instrument, more detailed map information is shown on the dashboard.

# Protective plate

Protects the engine, oil pan and transmission from impacts when driving in poor conditions, for example on bumpy or potholed roads. Fully covering aluminium plate that also prevents impacts from loose stones. The protective plate has undergone several tests to ensure durability in the event of more severe knocks and has been used by the Swedish police, without any reported problems.

The plate does not create any noise and it is verified that the engine is correctly cooled

Note: Not for MC10 & MC15 MY19

# Floor mats

## Plastic

Floor mats for the passenger compartment floor, including a tunnel mat. The mats are made of soft and flexible plastic, with a feeling of rubber. They have raised edges all around, and give effective protection for the car's interior against wet and dirt. The material is rugged and designed in a pattern with soft edges and radii. The driver's mat has a comfortable textile foot plate that protects the shoes from wear. Both the mats' colour and shape are matched to make them seem integrated with the car's interior. The mats are easy to install and seal tight against the floor. They are held in place with integrated clips through leak-protected installation holes, and can easily be removed and rinsed off with water

# Skid plate kit

Front & Rear

The following features are part of the Skid plate kit:

## **Skid plate, front bumper.**

A styling feature for the front that creates a robust impression and reinforces an aggressive attitude. The “Skid plate, front bumper” in brushed stainless steel replaces the standard mounted skid plate. A unique lower spoiler available in all exterior body colours and lower mesh are included.

## **Skid plate, rear bumper.**

A styling feature in brushed stainless steel that is highly visible and exclusive. The “Skid plate, rear bumper” replaces the standard mounted skid plate. A unique lower spoiler available in all exterior body colours and lower mesh are included. The kit also includes two fully integrated end pipes with unique dual connection pipes, for all engine variants, on each side, that perfects the unique and exclusive character.

Note: Not for MC10 & MC15 MY19

**Order Code: DECOF**

# Running board

Integrated with illumination

**This running board differs from the running board that is included in the exterior styling kits. It can be used as a standalone feature, or in combination with the skid plate kit.**

An exclusive and stylish running board that enhances the luxurious appearance of the car. The running boards will simplify getting in and out of the car and when loading the roof. The running boards have LED illumination strips on the outer edge that both indicate where to put the foot and give the car a cool and high-tech appearance. Light coordinated with interior light logic. To reduce the risk to slip on the top surface, rubber inserts are integrated in the metal part. The running boards are mainly made of strong aluminium to achieve high strength and lowest possible weight and will withstand a weight of 300 kg. Available in all exterior body colours, with brushed stainless steel steps. Replaces the standard mounted sill mouldings.

Note: Not for MC10 & MC15 MY19

**Running board (cannot be combined with styling kit)**

# Sunshade

## Front windscreen

With a sunshade in the windscreen, your car will maintain a cooler temperature on hot days. The sunshade helps to prevent the sun from heating up the interior, maintains both the air and the interior at a more comfortable temperature on hot days. By protecting your car from direct sunlight, the sunshade also helps to preserve the car's interior colours.

The sunshade has a stylish design and is a very good fit for your car. You can easily install it on the inside of the windscreen and it is secured by the car's sun visors.

When the sunshade is not in use, it is easy to take off, fold up and store in the supplied bag. The sunshade meets Volvo's quality requirements and retains its shape and rigidity after use.

### Sunshade for windscreen

USD	EUR	CAD	GBP
85	75	105	65

**Order Code : SUNS**

# Sunshades

## Rear doors and load compartment

Fully covering sunshades that provide maximum protection for your passengers when the sun is bright and irritating. Not only do they effectively protect against heat and irritation from sunlight, they also give the car a stylish look similar to tinted windows.

The shades are uniquely tailored to the rear windows of your car, providing a more comfortable trip in strong sunlight.

If the rear side windows need to be lowered during a journey the sunshades minimize the wind noise or "booming noise" that can arise. When the sunshades are not used, they can be stored in the supplied bag.

# Cargo mat

Textile and reversible

A high quality, reversible protective mat. The mat is practical and waterproof with tufted textile on one side and plastic on the other. The mat has an integrated practical dirt cover that can be folded down over the bumper. This prevents clothing from becoming dirty and protects the bumper when loading and unloading.

The mat has an attractive design with scalloped edges. The textile is color coded to match the rest of the interior.

The mat is available in two versions: a mat for 5-seater cars and a two-piece mat for 7-seater cars. The 7-seat mat can be used both in the folded up and down position of the third row. In the folded up position, the front part of the mat is easily removed from the car.

## Cargo mat, textile

USD	EUR	CAD	GBP
145	115	160	90

**Order Code : AY**

# Cargo mat

## Plastic

An attractive plastic protective mat that is adapted to fit the load compartment and is color coded to match the rest of the interior.

To prevent the load from sliding around during transport, the mat is coated with a layer of friction-increasing material.

The mat also has raised edges that effectively prevent dirt and water from leaking out into the load compartment.

The mat is available in two versions: a two-part mat for 5 seater cars and a three part mat for 7 seater cars.

The mat for 7 seater cars can be used when you have the third row of seats folded up or down. The front parts can be stacked on top of each other in the car or removed from the car when the third row of seats is upright. The mat can be used together with carrier bag holder.

### Cargo mat, plastic

**Order Code: GK**

# Dirt Cover

Fully covering

A practical protector for the load compartment that covers the floor and side walls of the load compartment plus the rear of the rear seats. Made from durable, dirt-resistant vinyl.

Provides very effective protection of the entire load compartment when carrying dirty loads. The protection has an integrated dirt cover that can be folded down over the bumper. It prevents clothing from becoming dirty and protects the bumper when loading and unloading.

The backrest part of the protection can be divided in two places via zippers so that the rear backrests can be folded independently of each other. The protector also has different practical pockets on the sides, a net pocket and a pocket with zipper.

The load compartment cover is easy to use and is simple to secure and remove. It is secured using elastic straps around the head restraints and with press-studs, which are secured to the side panels.

## Dirt cover

USD	EUR	CAD	GBP
265	235	310	170

**Order Code: LA**

# Luggage cover

MC31 & MC39

A stylish, retractable load compartment cover that conceals luggage in the load compartment. The cargo compartment cover is housed in a cassette positioned on the back of the rear seats. When the cargo compartment cover is used, it is simply pulled out from the cassette like a blind and snapped into position.

Note: Only for MC31 & 39 (7 seaters) (standard on all other MC)

## Luggage cover

USD	EUR	CAD	GBP
360	325	425	235

**Order Code: A00078**

# Cargo net

## Steel

A practical protective grille that prevents loads or pets from being thrown forward into the passenger compartment in the event of heavy braking or a collision.

The grille is easy to install in and remove from the prepared mounting points. It cannot be folded up onto the ceiling, but must be removed if not in use.

The second row of seats can be tilted as usual, even with the grille installed. The grille has been fully tested and meets all safety and legal requirements.

Note: The protective grille must not be mounted when the third row of seats is in use.

### Cargo net, Steel

USD	EUR	CAD	GBP
225	185	245	145

**Order Code: DC**

# Cargo net

## Nylon

A practical check pattern safety net in sturdy nylon. The net prevents luggage and cargo from moving forward into the passenger compartment when braking hard.

The safety net should be used each time the backseat is folded down, and when large or heavy loads are transported.

The net is then easily positioned in the front roof brackets. Quick and easy installation. Use the existing mountings and mounting eyelets.

### Cargo net, Nylon

USD	EUR	CAD	GBP
270	220	295	170

**Order Code: A00041**

# Cargo Divider

Steel

The load compartment divider enables you to separate the load compartment lengthwise and achieve two load compartments in one.

The load compartment divider is installed together with the steel protective grill. It enables the transport of either two pets or one pet on one side and objects such as luggage on the other.

The load compartment divider has been crash tested and is designed so that it cannot enter the passenger compartment in the event of a collision.

Note: Only in combination with Cargo net (Order code DC)

## Cargo divider, Steel

# Dog Gate

Left & Right

The dog gate is a very practical accessory for dog owners, keeping the dog both safe and secure while travelling. It also helps and prevents the dog from jumping out from the car when the tailgate is opened. One or two dog compartments can be created in combination with the protective grille and load compartment divider, with a gate mounted on the right or left side or on both sides. The gate is very easy to open, close and remove from the car.

Note: Only in combination with Cargo net and Cargo Divider (Order code DC and E8)

# Comfort pillow

## Charcoal

Volvo's neck cushion provides comfortable support for the head thanks to its soft materials and high mouldability.

The neck cushion consists of a textile covered visco-elastic foam that moulds to the contours of your neck. For passengers who are resting or sleeping the neck cushion contributes to comfort as it helps keep the head steady.

The neck cushion is offered in two different versions, in a wool fabric (Beige) and in a nubuck (Charcoal) fabric. The wool fabric which consists of 80% wool is a natural material that is soft and strong. Its excellent breathability contributes to the neck cushion feeling both warm and cool depending on the climate. The nubuck fabric is a durable, high quality material. It provides comfortable support thanks to its soft surface.

The neck cushion is easily attached to the seat using an elastic band and fits all the seats in the car. The back of the neck cushion has a zip that makes it easy to remove the cover for cleaning and airing.

### Comfort Pillow Charcoal (Nubuck)

# Child seat

## Padded upholstery

Padded upholstery for cars equipped with integrated booster cushion. The upholstery has side support that gives the child a comfortable and safe car journey, while at the same time the car's original upholstery is kept clean. It is made of strong high quality fabric and consists of three parts that combine into one complete unit. The side supports can be easily removed prior to washing, thanks to a zip.

### **Cushion upholstery**

The upholstery is easily pulled over the raised booster cushion and is removed when you need to fold it down. The bottom edge of the upholstery has a dirt cover in vinyl plastic that protects the rear seat's original upholstery.

### **Backrest upholstery**

Integrated side support improves comfort and keeps the child securely in place. The upholstery is installed around the standard head restraints and attached at the lower rear section of the backrest.

### **Head restraint upholstery**

A head support that is easily fitted over the standard head restraints in the rear seat and which is attached with Velcro fasteners. Integrated foam pads at the sides give comfortable support and keep the child's head in place while resting

### **Child seat padded upholstery**

USD	EUR	CAD	GBP

**Order Code : CSPU**

# Child seat

## Child booster cushion and backrest

This accessory ensures that your child has a safe and secure car trip. Used together with the standard seat belt, it gives the belt the correct contact with the child's body to provide the best capture in the event of a collision. In addition, the child is higher up and has a better view.

For children between 15 kg and 36 kg (33-80 lbs), approx. 3-10 years old. Volvo recommends that your child sits facing backwards in the car to at least 3-4 years of age.

The angle of the backrest can be adjusted to two different angles to give your child a more comfortable sleeping position and has five heights positions.

For the safest placement of a child in the car, see the car's owner's manual.

Note: Regulations regarding the placement of children in the car and the type of child seat to be used may vary from country to country. Find out what applies in your country.

# Towbar

## Trailer hitch (US & Canada)

A tow hitch especially designed for the North American market. Via the simple removal of a pin the ball holder is very easy to remove to enable mounting of hitch mounted accessories.

The tow hitch consists of three main components:

Crossmember, ball holder and a ball with a diameter of 2".

The vehicle bodywork is prepared for installation. To provide the best protection from corrosion the towbar has undergone multi-layer corrosion treatment. The tow ball is zinc-nickel coated.

For high strength and tow weight rating, the towbar is manufactured with conventional welding

Note: Only for MC3x (US & Canada)

### Towbar, Trailer hitch

975	-	1 150	-

**Order Code : DA**

# Towbar

Semi electrical

With this retractable towbar you will no longer need to worry about reaching under the car to release or remove the towbar. By a mere push of a button, conveniently placed in the luggage compartment, the towbar releases from underneath the car. With a simple movement either by hand or foot the towbar is moved into its locked position. Storage of the towbar is just as convenient. For added security an indicator light in the button shows that the towbar is locked. If the towbar is unlocked during driving a warning message will be displayed in the Driver Information Module. No towbar cover is required. Even plugging in the trailer's electrical contact (13-pin) could not be more convenient, with the socket being integrated into the towbar itself.

Note: Not for MC10, 15, 31 & 39

# Key fob shell

Wood

Choose between two high-quality, luxuriously designed wooden key fob shells that tastefully match the interior of the car. Key fob shells make your key more decorative and harmonize with the car's Scandinavian heritage.

Wood veneers are hand-picked and carefully selected to find the material best suited to you.

The natural texture, colour and grain of the wood gives each key fob shell a unique look. Each key fob shell is therefore exclusive.

The key fob shell is made by hand with great care and precision. You can change shell yourself or your dealer can assist you.

Choose between two attractive wood versions, with different nuances and structure:

Dark Flame Birch made of birch and has a classic dark appearance with a luxurious high gloss finish.

Linear Walnut made of walnut wood with a more modern look where the wood's texture and authenticity can be felt.

# Red key

A key for car owners who want the car to be driven responsibly even when someone else is driving it. Red Key helps, for example, parents to encourage young adults to drive responsibly. It also means that you can feel assured when you use valet parking or leave your car at a workshop.

The following settings can be made:

- Restricted top speed. 120 km/h (75 mph) is preset.1
- Cruise control, adaptive. The longest interval to the vehicle in front is preset.2
- Speed warning. 50, 70 and 90 km/h (30, 45, and 55 mph) is preset.3
- Restricted sound level. The volume has a restricted level, which is either on or off. Restricted sound level is preset.

The car's safety functions are always on, which can include the following functions depending on which safety functions the car is equipped with:

- BLIS (Blind Spot Information System).
- Lane Keeping Aid and Lane Departure Warning.
- Forward Collision Warning.
- Driver Alert Control.
- Distance Alert.
- Traffic Sign Recognition.

# Extra Key with remote control

## Remote control

The all-new Volvo XC90 has a completely new and fresh Scandinavian-design remote control. The wide upper and lower surfaces are clean, without any buttons – just a large Volvo-symbol on the upper side. Buttons in aluminium finish are discreetly integrated on the sides – for locking and unlocking the doors and one for the tailgate on one side and a button for the panic alarm on the other side.

At the upper end is a specially designed key fob holder.

Emergency metal key blade is included (hidden inside the remote control)

The remote control for the Inscription variant is clad in leather in the same colour as the upholstery and the R-Design remote control is clad in black perforated nappa leather.

## Key and Remote control (1 piece)

# Lockable bolt

## Lockable wheel bolt kit

Lockable wheel bolts specially developed for Volvo Cars, which gives improved safety. The lock pattern is located against the middle on the lockable bolts and is therefore difficult to reach with a screwdriver, for example. The top of the lockable bolt rotates and is therefore very difficult to loosen without the right wrench. A solid connection between wrench and bolt facilitates installation and removal, and in principle eliminates the risk of crooked tighten, which results in a damaged wrench.

The bolts have very good rust protection. The design is like a standard bolt but different enough to deter any thieves.

Volvo chromed lug bolts are developed to match Volvo's aluminium wheel rims. With their discreet and exclusive design they constitute a well-integrated part of the wheel area.

Note: Standard on MC10

# AutoSock

The perfect aid when driving on snowy and icy roads. The sock is easily mounted on the wheel and provides increased friction on snow and ice. It takes up little space and can be reused. The snow sock will not damage the rims.

The snow sock is made of a high-tech fibre material, the fibres of which are roughened during use in order to provide optimal grip. The material is both strong and resilient to further increase the wheel's contact area with hard snow and ice.

Note: AutoSock is not a replacement for snow chains in countries where it is required by law for snow chains to be kept in the car.
